

TAKE CONTROL OF YOUR SERVER ENVIRONMENT

Highly trained and certified professionals manage and monitor your servers.

For many organizations, maintaining mission critical Internet operations can be difficult, time consuming and costly. Money that is allocated for IT resources focused on these tasks could be put to better use.

With Managed Server Administration, companies can focus on their core business while reducing the need for in-house IT resources. Servers are monitored and maintained by our certified system administrators – freeing up your IT staff to concentrate on your business, content and server applications.

WHY WOULD YOU NEED MANAGED SERVER ADMIN?

- Server uptime is a requirement for your business.
- You want cost effective technical support.
- In-house IT resources spend too much time managing the server environment.
- You don't have enough IT resources to properly maintain server operations.

WHAT IS INCLUDED WITH MANAGED IT ADMINISTRATION?

KCSI works with you to develop a flexible support plan that is customized to fit your specific administrative and budgetary requirements. Our expert Managed Services team will work closely with you to develop a server administration solution to handle anything from routine to complex tasks – you choose the level of involvement you need.

- Server monitoring and response
- Process Audits
- Web and FTP Server Administration
- Log file Monitoring
- Application patches/hot fixes/service packs
- Backup procedures, monitoring and review
- Proactive resolution of hardware issues
- Disaster recovery management
- Hardware installation
- Application specific configurations
- Keep your servers fully up-to-date
